Governor Dayton made history recently by signing into law the Minnesota Insurance Marketplace Act and bringing a new, consumer-friendly health insurance marketplace to Minnesota families and small businesses.

"We applaud the legislature and Governor Dayton on this historic achievement for Minnesota. Nearly 300,000 currently uninsured Minnesotans will gain access to quality, affordable health care because of this landmark legislation," said Planned Parenthood Minnesota, North Dakota, South Dakota President & CEO, Sarah Stoesz.

"The Affordable Care Act marks the greatest advancement for women's health in a generation. It will ensure that every woman has access to comprehensive, preventive health care including life-saving cancer screenings, birth control and pap tests – with no out-of-pocket costs to them."

"As leaders across our state continue to work to implement the Affordable Care Act – we commend them for their tireless work to make Minnesota a healthier state."
