The vaccine will be offered in both the nasal spray and injected shot forms. Children in the 6 months through 9 years age group will need a second dose of the vaccine about four weeks after their initial vaccination.

Vaccine will be given on a first-come, first-served basis. A parent or guardian must accompany any child and sign a consent form in person at the dispensing site.

The vaccinations are free, but families with insurance should bring their card so administrative costs may be billed to their insurance provider.
